

States of Alderney Press Release

For immediate release: 21st September 2018

Sure Broadband Connectivity Issues - Resolved

We are pleased that the recent problems Sure have encountered over broadband connectivity on the island have been now resolved. We are also delighted that the company has indicated that it wishes to further enhance Alderney's internet connection with Guernsey later this year with a new 'state of the art' system with expanded capacity.

In the meantime, the Policy and Finance Committee will be reviewing progress on the superfast broadband initiative at its meeting to be held on 23 October. This review will also cover possible economic and social opportunities which could be opened up for the island now that the initiative is well advanced.

Once the Committee has had an opportunity to review progress on the project then a further statement will be issued.

James Dent
Chairman
Policy and Finance Committee
